

We want to learn more about the cleaning challenges you face in dealing with the build-up of heavy deposits of crude, paraffin, asphaltene, cosmolene and grease.

Contact us by phone, email or via our website. We will work with you to develop the right product set and applications to meet your needs.

*We Are Committed To Delivering Customized Cleaning Solutions To Solve Your Every Need*

National Distributor For:

*Pro* **CAD**<sup>®</sup>  
*Pro* **LITE DEGREASER**  
*Pro* **SEAL**

*Earth-Friendly Products For A Greener Tomorrow*

*Delivering Customized Cleaning Solutions for the Petroleum, Transportation, Mining, & Manufacturing Industries*

**Professional Grade, Heavy-Duty Cleansers With Multi-Use Applications**

**R**hine Enterprises, Inc. serves as a national distributor of earth-friendly products for the safe, non-toxic removal of heavy crude, paraffin wax, asphaltene, cosmolene, and grease from a variety of surfaces without the use of harmful acids and chemicals.

With over 25 years of proven performance in the petroleum, transportation, mining and manufacturing industries, these products provide cost-effective cleaning solutions for removing existing deposits and helps prevent future build-up problems from occurring, without causing damaging down-stream effects.

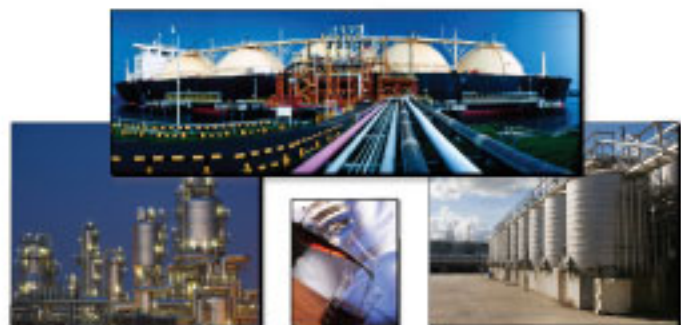

*Pro* **CAD**<sup>®</sup> *Pro* **LITE DEGREASER** *Pro* **SEAL**

Available in 5, 30 & 55 Gallon Containers & 275 Gallon Totes

*Earth-Friendly Products For  
A Greener Tomorrow*

**W**orking together, Rhine Enterprises, Inc. and our manufacturing partners provide environment-friendly, industrial strength cleaning solutions for some of the world's toughest challenges. Whether you are dealing with build-up of heavy deposits of crude, paraffin, asphaltenes, cosmoline or grease, we offer cleaning solutions that are safe, proven effective and cost efficient.

Tell us about your project. Visit our website and submit the "Contact Us" form. We will respond in a timely manner. Or, you may contact us by email or by calling Ann Rhine at the number below.

*Delivering Professional Grade, Heavy-Duty Cleaning Products  
For Crude, Paraffin, Asphalt, Cosmoline, & Grease Removal*

*Pro*  
**CAD®**

Since 1990, Pro-CAD has been in use worldwide with the refining, natural gas, mining, transportation and manufacturing industries to clean everything from heavy equipment to ACHE units. Pro-CAD is a highly specialized detergent degreaser and heavy-duty cleaner for crude, paraffin, asphalt, cosmoline, and grease removal.

*Key Benefits*

Unique, performance proven, biodegradable, environment friendly, and extremely cost effective, Pro-CAD provides a superior cleaning agent while offering the following:

- Enables application to a vertical or overhead surface due to viscosity
- Remains in a liquid state for several hours allowing time for the cleaner to react
- Does not adversely affect the cleaning surface due to neutral pH level
- Excellent rust inhibitor
- In most cases, painting can be done following cleaning

*Pro*  
**LITE DEGREASER**

Formulated for the transportation industry, Pro-LITE Degreaser is used to remove tough grease and grime while providing rust inhibitors. Pro-LITE is a light-duty degreaser that can be used on a variety of surfaces and may be applied with a pressure sprayer or steam cleaning equipment with hard, soft, hot or cold water.

*Key Benefits*

Safe to use, this versatile, quick acting water soluble and biodegradable degreaser is:

- Free of harmful bleach and ammonia
- Non-flammable
- Non-abrasive

*Pro*  
**SEAL**

Pro-SEAL was designed to provide long lasting surface protection. It's special activators cause the interlocking polymeric silicone in the product to electromagnetically bond to the applied surface.

*Key Benefits*

Non-abrasive and safe to use, Pro-SEAL adheres to any clean surface. It is a very complex biodegradable emulsion of wax, silicone polymers, synthetic surfactant stabilizers, mineral oils, and organic anti-corrosives that:

- Prevents filling and spotting
- Provides UV protection
- Rust inhibitor
- Deters development of salt pits in aluminum
- Extends the life of rubber

*Petroleum & Natural Gas*

Pro-CAD was specifically designed to safely remove crude, paraffin, asphalt, cosmoline, and grease build-up using biodegradable, hydrocarbon-based cleaning agents without the use of harmful acids and toxic chemicals. In the petroleum industry, Pro-CAD has been used to return oil wells to service that have been plugged for years. It is excellent for safely removing crude oil hydrocarbons and paraffin from sediment; removing road and crude oil from aluminum, fiberglass and stainless steel tanks; and most recently, in stripper well applications to free paraffin build-up down-hole, in flowlines and pipelines, and to lower downhole residual pressure on pumping mechanisms.

*Transportation*

All facets of the transportation industry have used Pro-CAD successfully, including freight haulers, road and crude oil companies, gas and diesel distributors, and mining/ore haul trucks. Pro-CAD has also been used by the largest manufacturers of new aluminum belly dumps, petroleum tanks and pneumatic air tanks in the United States, Canada, Germany, and Japan.

*Mining*

Some of the largest mining companies around the world including the United States, Canada, and Germany, have used Pro-CAD to clean electric drag lines—inside and out, wire rope, shovel sticks, and other equipment. Pro-CAD is preferred for its unique cleaning attributes and because it works well around electrical equipment where high pressure water cannot be used.

*Manufacturing*

Pro-CAD is used extensively throughout the manufacturing industry to clean cosmoline, and general grease and grime, from new hydro-generating plant gears, electric motors, and other heavy equipment.
